

# BE A CAREER EXPLORER

Help your child be a career explorer. Give your student a blank paper (or use the space to the right) and some crayons or markers. Ask your student to draw a picture of what he or she wants to be or of someone working at a job. Talk about your job and other people you both know and the jobs they do. Name some of the places you both go, such as school, restaurants, stores or a bank, and talk about the jobs of people there. You can visit the library to checkout books about careers your student is interested in or do research together on the internet.

Help your student write what they like about this job.
